## RE: UK Coronavirus Cancer Monitoring Project

To whom it may concern

Action Radiotherapy is the UK's only charity dedicated to improving radiotherapy. Our aim is to raise the profile of this underrepresented treatment modality and its vital workforce. We believe every cancer patient in the UK should have access to the best radiotherapy treatment available.

The UK Coronavirus Cancer Monitoring Project is a national scheme using clinician-led reporting to track cancer patients who have tested positive for COVID-19. Cancer centres across the UK are submitting information on the prevalence of COVID-19 infections and associated anonymised clinical data about each cancer case. Daily updates through a Live Clinical Data Dissemination System will help clinicians track cases at individual cancer centres as well as provide a rolling national picture on the impact of COVID-19 on cancer patients.

This project brings together a multi-institution, cross-speciality team of dedicated individuals and a network of "cancer COVID-19 response" reporting clinicians. It is a huge team effort with clear learning benefits for the oncology community and real potential to benefit patients through collaboration and innovation.

We are delighted to endorse this project.

Yours sincerely,

**Professor Pat Price MA MD FRCP FRCR**  
**Chair of Action Radiotherapy**

## Board of Trustees

Prof Pat Price (Chairman), Dr Christy Goldsmith (Secretary), Ms Tanya Levine (Treasurer), Prof Phillip Mayles, Dr Clive Harmer
